RANDA FAHAD ALZAHRANI

UX/UI DESIGNER · PRODUCT DESIGNER

Makkah, Saudi Arabia | +966 55 647 0445 | Randaalzahrani0@gmail.com
Portfolio: randa1-portfolio.vercel.app | LinkedIn: linkedin.com/in/randa-alzahrani-36820b274

Human-Computer Interaction graduate with a six-month product design internship at Easy Pay, contributing to user research, UI design, and reusable component libraries across four point-of-sale products. Targeting a junior UX/UI, product design, or UX research role, with end-to-end experience from research through usability testing and a focus on Arabic-first (RTL) interfaces.

SKILLS

DESIGN UI Design · Wireframing · Prototyping · Design Systems & Component Libraries · Information Architecture · User Flows · Arabic / RTL Design

RESEARCH User Research · User Interviews · Surveys · Competitor Analysis · Personas · User Journeys · Usability Testing

TOOLS Figma · Design-to-Development Handoff (Flutter) · Multi-Device Design (mobile, POS terminal, kiosk, customer display)

SOFT SKILLS Product Thinking . Problem-Solving . Cross-Functional Collaboration . Communication . Time Management

EXPERIENCE

Product Design Intern — Easy Pay — Feb 2025 – Jul 2025

Digital payments — Easy SoftPOS, Easy Fuel, Easy Kiosk, and Customer Display

- Contributed to user research across four products through user interviews and competitor analysis, translating findings into personas and user journeys that framed the design direction for each product.
- Designed wireframes and interactive high-fidelity prototypes in Figma that simplified the core task flows in each product.
- Built reusable UI component libraries for all four products, creating shared components and patterns that brought interface consistency across the Easy Pay suite.
- Conducted usability evaluations on the prototypes, refined user flows based on the issues they surfaced, and worked with developers to support implementation.

PROJECTS

Mishkat — Graduation Project, team of 6 — Sep 2025 – Jun 2026

Arabic-first mobile wellbeing app for gifted students — Figma, Flutter · mishkat.us

- Conducted the user research behind the product — 15 semi-structured interviews and 287 survey responses — synthesized into personas, user journeys, and the information architecture.
- Designed the Arabic-first (RTL) experience end to end in Figma: user flows, wireframes, high-fidelity screens, and a reusable design system the team carried into Flutter implementation.
- Ran three rounds of usability evaluation, six target users in the final round; iterations raised task completion from 68% to 92% and cut average completion time from 2.4 to 1.3 minutes.

SNB Banking App UI Improvement — Academic Project — Mar – May 2024

Coursework redesign of an existing banking app interface; refined screens and improved usability through structured design enhancements.

WATT — Smart Energy Tracking System — Academic Project — Sep – Nov 2024

Designed a system for tracking and optimizing household energy consumption, produced for a prototyping methods course.

EDUCATION

Umm Al-Qura University — BSc, Human-Computer Interaction in Software Engineering — Sep 2022 – Jun 2026

GPA 3.54 / 4.00 · Excellent with Second-Class Honours

CERTIFICATIONS & LANGUAGES

Banque Saudi Fransi University Program — mentorship & development program — Feb 2024 – Dec 2025

Languages: Arabic (Native) · English (Intermediate)
